

YOUSSEF SHERIF RAMADAN

Data Analyst | Business Intelligence & AI/Machine Learning

Giza, Egypt | +20 01115843771 | yshreef924@gmail.com | linkedin.com/in/youssefsherif | github.com/YoussefSherif218

SUMMARY

Data Analyst with hands-on experience in data analysis, SQL, Power BI, and Excel, gained through a 9-month Applied AI & Data Analytics scholarship, a published computer-vision research project, and independent portfolio projects. Skilled in writing complex SQL queries, building ETL/ELT pipelines, and designing Power BI/Excel dashboards for KPI tracking and business decision-making. Experienced in data cleaning, EDA, data modeling, and root cause analysis (RCA), turning raw data into clear, actionable insights. Complements this with applied AI/ML experience — predictive modeling, deep learning, and Generative AI/LLMs. Biotechnology background contributes strong analytical rigor and structured problem-solving.

CORE SKILLS

- Data Analysis:** SQL, Power BI, Excel (Pivot Tables, VLOOKUP), EDA, Data Wrangling, Statistical Modeling, RCA, Data Modeling, Business Reporting, Hypothesis/A-B Testing, Regression Analysis
- SQL & Databases:** Complex SQL queries, joins, subqueries, views, stored procedures, database design, SQL Server, relational schema design
- Data Engineering (ETL/ELT):** ETL/ELT pipeline design, data cleaning & preprocessing, data quality management, data pipelines
- Data Visualization & BI:** Power BI (DAX, dashboard design), Excel dashboards, Tableau, Matplotlib, Seaborn, Streamlit, KPI Reporting & Tracking, Ad-Hoc Reporting, Business Intelligence (BI)
- Artificial Intelligence & Machine Learning:** Supervised & Unsupervised Learning, Predictive Modeling, Deep Learning, Neural Networks, K-Means Clustering, Feature Engineering, Model Evaluation, Generative AI, LLMs
- Programming:** Python (Pandas, NumPy, Scikit-learn), DAX, PySpark (familiar)
- Tools & Platforms:** Git, Cloud Platforms (Azure, AWS familiarity), Meta Business Suite, Google Ads, Canva

PROFESSIONAL EXPERIENCE

Applied AI & Data Analytics Trainee

Dec 2025 – Present

Digilians Initiative — 9-Month Scholarship, Ministry of Communications and Information Technology (MCIT)

- Applied statistics and data analysis techniques using Python, SQL, and Excel to analyze large, multi-source datasets and identify trends, patterns, and anomalies.
- Built and evaluated predictive machine learning models, improving model accuracy through iterative feature engineering.
- Performed data mining, ETL-style data preparation, and structured SQL querying to extract actionable business insights and support Power BI/Excel-based KPI reporting.
- Analyzed web and social network data to support data-driven decision-making, translating raw data into clear, actionable insights for stakeholder reporting.
- Completed a Capstone Project solving a real-world analytics problem end-to-end, from data collection and data quality checks through insight delivery and presentation.

Social Media Marketing Track — 4-Month Program

Nov 2024 – Mar 2025

Information Technology Institute (ITI), Ministry of Communications and Information Technology (MCIT) — Fayoum Branch

- Trained in email marketing, graphic design, content creation, and photography/video editing; managed social media pages and paid ad campaigns using Meta Business Suite and Google Analytics, using Photoshop and video editing tools to produce engagement-driving content.

Senior Social Media Specialist

Feb 2025 – Oct 2025

Arcktech Marketing Agency

- Analyzed performance analytics and audience insights across 7 client accounts to optimize engagement and inform content strategy decisions.
- Built and maintained content calendars and reporting workflows using Meta Business Suite, Canva, and Buffer, improving publishing consistency across multiple platforms.
- Delivered data-backed strategy recommendations directly to clients based on monthly performance metrics.

Social Media Specialist

Mar 2024 – Dec 2024

Vook Marketing Agency

- Tracked and analyzed campaign performance metrics across multiple platforms to optimize content strategy and improve audience reach.
- Managed end-to-end social media strategy for multiple client accounts, aligning content output with measurable brand goals and KPIs.

Social Media Specialist

Jan 2023 – Feb 2024

Creative Digital Marketing

- Developed data-driven marketing strategies tailored to target demographics, using performance data to guide campaign decisions.
- Produced high-converting content that measurably boosted engagement rates and audience growth.

Customer Service Representative

Oct 2020 – Feb 2022

Concentrix

- Resolved inbound and outbound customer inquiries efficiently while maintaining high service quality standards.

DATA & AI PROJECTS

DAFEsteel: Real-Time Steel Surface Defect Detection (Team Research Project)

Python · PyTorch · YOLOv11 · Computer Vision · Docker · FastAPI | [github.com/hazemelerefey/DAFEsteel](#) | [arXiv preprint](#)

- Contributed as Researcher, Module Architecture, and Model Code on a 6-person team that built DAFEsteel, a real-time defect detection system for hot-rolled flat steel production lines centered on DAFEGate-YOLO, a novel dual-branch detection model, published as an arXiv preprint under Digilians (MCIT).
- Helped design and implement DAFEGate — a plug-in backbone enhancement module for YOLOv11n using morphology-specialized dual branches (edge-aware and texture-aware) fused via squeeze-and-excite attention with an additive residual connection to preserve gradient flow.
- Contributed to model code and experimentation across 18 tracked experiments and an ablation study, helping push performance from a 79.35% mAP@0.5 baseline to 81.98% (+2.63pp), while keeping real-time inference at 145 FPS; deployed as a live Hugging Face demo and a Dockerized FastAPI REST service.

RetailPulse AI: Customer Segmentation Engine

Python · Scikit-learn · Pandas · Matplotlib · Streamlit | [github.com/YoussefSherif218/Retail-Pulse-AI-Strategic-CustomerIntelligence](#)

- Built an end-to-end ML pipeline on the UCI Online Retail II dataset (~1M rows) to segment customers into 4 business archetypes using K-Means clustering with RFM features, delivering a live Streamlit dashboard; found the Champions cohort (10% of customers) drives 40–50% of total revenue, enabling targeted marketing budget allocation.

Bank Marketing Analytics: Conversion Optimization

Python · Pandas · NumPy · Seaborn · SciPy | [github.com/YoussefSherif218/Bank-Marketing-Analytics](#)

- Performed comprehensive EDA and root cause analysis on 4,521 records across 17 features to identify key drivers of term deposit subscription in a highly imbalanced dataset (11.5% positive class); found call duration as the strongest predictor (553s vs. 226s, a 2.4x gap) and produced 3 actionable campaign recommendations.

Corelytics: Body Performance Data Analysis & Classification

Python · SQL-style Data Analysis · Scikit-learn · XGBoost · SHAP · Pandas · Matplotlib/Seaborn | [github.com/YoussefSherif218/Corelytics-Body.Performance](#)

- Built and benchmarked 6 ML classification models (KNN, Decision Tree, SVM, MLP, XGBoost, Voting Ensemble) on 13,272 fitness records; achieved 89.0% accuracy (binary) and 77.5% (4-class) with XGBoost, confirmed via paired t-tests (p<0.05) and explained with SHAP.

Transportation & Logistics Tracking: Data Analysis, SQL & Delay Prediction

SQL Server · ETL · Python · Scikit-learn · Orange Data Mining | [github.com/YoussefSherif218/Transportation_and_Logistics_Tracking](#)

- Conducted end-to-end EDA and root cause analysis on 6,880 GPS-tracked shipment records; trained a Random Forest classifier achieving 88.9% accuracy in predicting delivery delays (top predictors: distance and GPS provider reliability). Designed a normalized SQL Server database (11 tables, full ERD), built an ETL process from CSV sources, and wrote 10 SQL business queries and reporting views covering courier performance and revenue.

Retail SQL Lab: Data Analyst SQL Project — Online Retail II

SQL Server · SSMS · ETL · CSV/Excel Data Sources | [github.com/YoussefSherif218/Retail-SQL-Lab](#)

- Designed and implemented a 5-table relational schema (Country, Customer, Product, Invoice, InvoiceLine) in SQL Server for over 1 million retail transaction records, with full referential integrity (data modeling).
- Built an ETL process to load raw CSV source files into SQL Server, handling delimiters and data type validation; performed EDA and root cause analysis via SQL, surfacing two critical data anomalies (a -53,594 minimum price and a -80,995 minimum quantity), and built a 6-view analytical layer for repeatable Power BI/Excel reporting.

EDUCATION

Bachelor's Degree in Biotechnology

Sep 2019 – Jun 2023

Cairo University

CERTIFICATIONS & COURSES

- Microsoft Certified: Power BI Data Analyst Associate (PL-300) | July 2026 | Data Analyst in Python & SQL — DataCamp
- Foundations: Data, Everywhere — Google/Coursera | Digital & Content Marketing — HubSpot | MS Office

Languages: Arabic (Native) | English (Intermediate) | German (Intermediate)
